## **Now Fuel + Nail Combo Packs Work With ALL Paslode® Cordless Framing Nailers**

### *Fuel Cell Adapter Allows All Cordless Framing Nailers to Use Combo Packs*

VERNON HILLS, IL – Paslode® is introducing a new Fuel + Nail Combo Pack with a twist-on adapter, allowing users of older generation Paslode cordless framing nailers to take advantage of the convenient combo pack concept.

Now all Paslode cordless framing nailers can achieve optimized performance with the PowerBoost™ Black Tip Coated Nails (3" and 3-1/4"), which are only available in the Fuel + Nail Combo Packs. The PowerBoost™ Black Tip Coating is a proprietary coating that allows Paslode cordless framing nailers to drive the nail flush into the hardest engineered lumber, such as LVL, something many pneumatic nailers cannot do.

"Until now, the Fuel + Nail Combo Pack would work only with our newest cordless framing nailer, the CF325," said Steve Golich, Marketing Manager for Paslode. "Today we are including a backward compatible adapter with each Fuel + Nail Combo Pack so that contractors using older versions of our tools can benefit from the convenience of the Fuel + Nail Combo Pack and the performance of the PowerBoost™ nail."

For contractors using older versions of the Paslode cordless framing nailer, it is as easy as twisting off the top on the fuel cell and twisting on the adapter, no snapping necessary.

The new PowerBoost™ Black Tip Coating on these nails also translates into better performance at higher altitudes in parts of the U.S. where, typically, combustion-type framing nailers have had drivability issues due to the lack of oxygen. These nails finally allow remodelers and builders in high altitude markets to benefit from the freedom of cordless framing nailers without the hassle of hoses and compressors.

The new PowerBoost™ nails feature paper tape collation which reduces scrap and eliminates flying debris. Plus, they are full head nails that offer maximum holding power, helping professional contractors comply with building codes where a round head nail is specified.

**PASLODE Fuel + Nails Plus Adapter**  
**2-2-2-2**

Fuel + Nail Combo Packs come in two sizes: 1,000 nails with one Quicklode™ fuel cell and one adapter, or 3,000 nails with three Quickload™ fuel cells and three adapters.

**Converting To Cordless – Fuel Powered Mobility**

A Paslode fuel powered cordless framing nailer coupled with the new framing nails with PowerBoost™ Black Tip Coating gives you the power of a pneumatic with the freedom of a cordless tool. And the facts speak for themselves, by using only cordless tools on the jobsite, you have a safer jobsite and you save time and money. Paslode has done the studies. Check out the Cost Saving Calculator on the Paslode website at

<http://www.paslode.com/calculators/CordlessCalculator.aspx>, and see for yourself how you save time and money by using Paslode fuel powered cordless tools.
