

PRODUCT BULLETIN

Bulletin #: 185
 Date: June 1, 2023
 Subject: Discontinuation of Red Framing Fuel Metering Valve Adaptor

Paslode launched the first ever cordless framing nailer in 1986 and we have been improving on that technology with various system updates over the years.

One of those improvements was implemented with the 2010 launch of the Paslode Cordless Framing Nailer Model CF325Li (SKU# 902600) which utilized a new Orange Quicklode™ Fuel Cartridge and eliminated the need for the separate metering valve adaptor provided with the Red Fuel Cartridge. The Quicklode™ Fuel Cartridge is now simply called **Orange Framing Fuel Cell** and is the Paslode fuel standard stocked at Distributors nationwide.

Since 2010, we have continued to provide the metering valve adaptor in the box with the Orange Framing Fuel Cell and in our Framing Fuel & Nail Packs to support our valued customers who are still using their trusty Paslode Cordless Framers manufactured in 2009 and earlier.

As we have come to the end of our service term for tools manufactured in 2009, **Paslode will no longer provide the Red Framing Fuel Metering Valve (adaptor) with the Orange Framing Fuel or Fuel & Nail Packs.** The adaptor will not be available to purchase separately.

The table below identifies which Cordless Framers models require the adaptor and are therefore impacted by this change:

Product	SKU	Model	Adaptor Required (Y/N)
Paslode Cordless 30° Framing Nailer	900420	IMCT	Y
	902200	CF325	Y
	902600	CF325Li	N
	905600	CF325XP	N
	906300*	CFN325XP*	N

*Current model

We regret any inconvenience this discontinuation may cause.
