

HardieNail™

Studless Siding Fasteners

FEATURING PASLODE
tetraGRIP™
FASTENING TECHNOLOGY

Installs 20% faster on average*
No marking studs • Fewer cuts • Less waste

Securely fastens fiber cement siding directly to
OSB sheathing, fastening to stud not required

tetraGRIP™ FASTENING TECHNOLOGY

DRIVES LIKE A NAIL. HOLDS LIKE A SCREW.™

Why It Works Better

The revolutionary tetraGRIP™ technology barbed helix design of the HardieNail™ Studless Siding Fastener drives as fast as a nail and has the holding power of a screw.

- Rotation Bonds Nail to Wood**
 Mechanically bonds with the wood fibers for superior holding power.
- Strong Non-Destructive Wood Interaction**
 Efficient rotation helps eliminate wood destruction common in standard ring shank nails.
- Superior Withdrawal Resistance**
 The barbed helix-to-wood engagement creates a high load capacity and does not require a nail-to-stud interaction.

Save an average of 20%* by eliminating the time needed to locate and mark studs, and to measure and cut planks to land on studs. Fastening James Hardie HardiePlank® Fiber Cement Siding directly to OSB with the patented 1-1/8" fastener helps prevent unintended damage to utilities behind sheathing and more importantly may increase your crew's productivity allowing you to take on more jobs per year.

- No marking and hitting studs
- Less measuring
- Less cutting
- Less waste
- Less risk of callbacks

HardieNail™ Studless Siding Fasteners featuring tetraGRIP™ Fastening Technology

1-1/8" x .117"

304 Stainless Steel

Fastener Type:
0° Coil Siding Nail

Fastener Finish:
304 Stainless Steel

Head Size:
Full Round Head – 0.300"

Paslode Part #	Description	UPC Code 7-59501-	Selling Unit	Units/ Carton	Inner Packs/ Carton	Weight/ Carton (LBS)	Cartons/ Pallet	Weight/ Pallet (LBS)
